Hi Steve

I know we have been looking into it but I am not sure where things stand.

I have copied the staff who are closer to this work.

Thanks

Stan

Subject: Mythelcyclohexane Methanol

Stan,

I work with USEPA's Water Security Division, and we received questions from residents of Charleston, WV about whether home treatment or personal use water purification devices can remove mythelcyclohexane methanol (MCHM). Eric Burneson (USEPA) indicated that you previously contacted him, and he provided me with your contact information. Do you have any information that could help to answer this question? Is NSF doing any work or planning any studies to evaluate the ability of consumer products to remove this contaminant?

Thanks for any information you can provide. FYI, I sent a similar request to Bruce Bartley (NSF), whom I've worked with previously on projects unrelated to this issue.

Thanks,

Steve
